THE COMPLETE MARVEL COMICS READING ORDER

1939 - 2022

JOSEPH SHRIMPTON

"Gentleman of the press, I have called you to my laboratory because I, Porfessor Horton, have a difficult problem in my latest discovery..."

- Professor Horton, ***Marvel Comics #1***

FOREWORD

We have collated every Marvel Comic ever released, in reading order instead of release order. Our aim is to create an easy, accessible source that newcomers to reading comics can refer to that simply explains the correct reading order of the comics all the way from the beginning in 1939 with *Marvel Comics #1*. In our book, we have separated it into chapters covering the different eras of comics releases and the special crossover events within them as well as giving a brief insight into the characters introduced during these eras. Some of the comics included in this list are hard to source and read but the vast majority can be read online on Marvel Unlimited or purchased on the second-hand market. Although our list begins in 1939, it is not recommended for true beginners to comics and these characters to start at the beginning, although you will experience the true origins of a large number of characters this way it is recommended to start within the Silver Age in 1961 as this is what is widely viewed of as the beginnings of Marvel Comics as we know them today. A common question that arises when people start reading the comics is why the characters take so long to age in relation to the time periods the comics were released in and a general rule to go by regarding the passing of time within marvel comics is that five real-world years equates to one Marvel Comics year for the characters and heroes. The thought of starting to read Marvel Comics can be daunting, hopefully, with this guide, we can help you to more easily navigate your way through the 83 years of Marvel Comics action in the most cohesive and accessible way possible.

The Marvel era as we know it began in 1961, the year that the company launched The Fantastic Four and other superhero titles created by Stan Lee, Jack Kirby, Steve Ditko and many others. The Marvel brand, which had been used over the years, was solidified as the company's primary brand.

Crossover Events:

Secret Wars, Wraith War, Secret Wars II, Mutant Massacre

First Appearances:

Apocalypse, Beta Ray Bill, The Beyonder, Forge, Hobgoblin, Madelyne Pryor, Nebula, New Mutants, Psylocke, Symbiote, X-Factor, Yukio

Here we see the birth of large scale crossover events. Contest of Champions is Marvel's first Limited Series and serves as a sort of prototype for the line-wide crossovers to follow. The original Secret Wars event is wildly successful and its less successful sequel comes out a year later. The X-Men line expands with the introduction of X-Factor and the New Mutants. The popular villain Apocalypse is introduced and we see the beginnings of the symbiote that will go one to become Venom.

Secret Wars:
The Secret Wars event began in each individual hero's respective magazines, with all of the chosen heroes feeling "called" to a massive mechanical ring that mysteriously appeared in Central Park and that instantly transports them to a location called Battleworld when they step inside. It is soon revealed that a cosmic entity known as the Beyond had gathered this large assortment of superheroes and super-villains on Battleworld to see who would win in a fight of good against evil.

The 90's "Dark Age of Comics" is in full swing. We see the seminal X-Men event Age of Apocalypse as well as the Spider-Man event Second Clone Saga. The first of several Marvel Alternate Universes are printed in this era; the futuristic Marvel 2099 and the MC2 universe, which mainly featured Spider-Girl. Near the end of this section we see many of the most popular and long-running Marvel series relaunched with new #1 issues that will serve as a good jumping on point for new readers. In this time period the comic book market crash happened leading to the industry having to reposition itself going forward.

Marvel 2099:
Marvel 2099 explores a possible, dystopian future of the Marvel Universe. North America is a corporate police state ruled by a few huge megacorporations, most notably Alchemax, which owns the private police force the Public Eye. There are no active superheroes in the world, and the previous heroes are mythologized through religion, as with the Church of Thor.
